

Urban water supply charges 2026/27

Residential, non-residential and recycled water

Our urban tariff structure is based on the quality of water supplied and, in untreated water supply towns, the source of that water.

There are two different water qualities supplied to our customers in the 71 towns throughout our region:

- **Fully treated water supply** (also known as drinking water or potable water)
- **Untreated water supply** (also known as non-drinking water, regulated or non-potable water).

Our tariffs have been approved by the Essential Services Commission for the 2026/27 financial year and include the annual Recreation Contribution Charge of \$21.68, or \$10.84 for concession card holders.

Our tariffs were advertised in various newspapers in July 2026.

Water quality		Service availability charge*	Concessional/ Community facility service availability charge	Usage charge
Fully treated water supply	Residential	\$494.04 per annum	\$317.36 per annum	\$1.9300/kL
	Non-residential	\$472.32 per annum		
Untreated water supply <i>Pipeline supplied and Eastern Grampians towns</i>	Residential	\$436.08 per annum	\$317.36 per annum	\$1.7562/kL Pipeline supplied towns
	Non-residential	\$414.36 per annum		\$1.4219/kL East Grampians towns
Untreated water supply <i>Groundwater towns</i>	Residential	\$433.92 per annum	\$317.36 per annum	\$1.0806/kL Groundwater towns
	Non-residential	\$412.20 per annum		

* Based on a 20 mm meter connected to the property.

Where applicable, some customers may also access recycled water. These charges are outlined below:

Recycled water	Usage charge
Recycled water charges (where available) <i>Usage Tariff Discounts</i> may apply to sporting and other community-based groups pending eligibility.	\$320.83 per megalitre
